

# FLOOD RELIEF TENT VILLAGE

## PROTOTYPE DESIGN FOR FLOOD AFFECTED AREAS IN PAKISTAN

National Engineering  
Services Pakistan  
(Pvt.) Limited

Pakistan Engineering Council

Institute of Chartered  
Accountants of Pakistan

Constructors Association  
of Pakistan

Pakistan Council of Architects  
and Town Planners

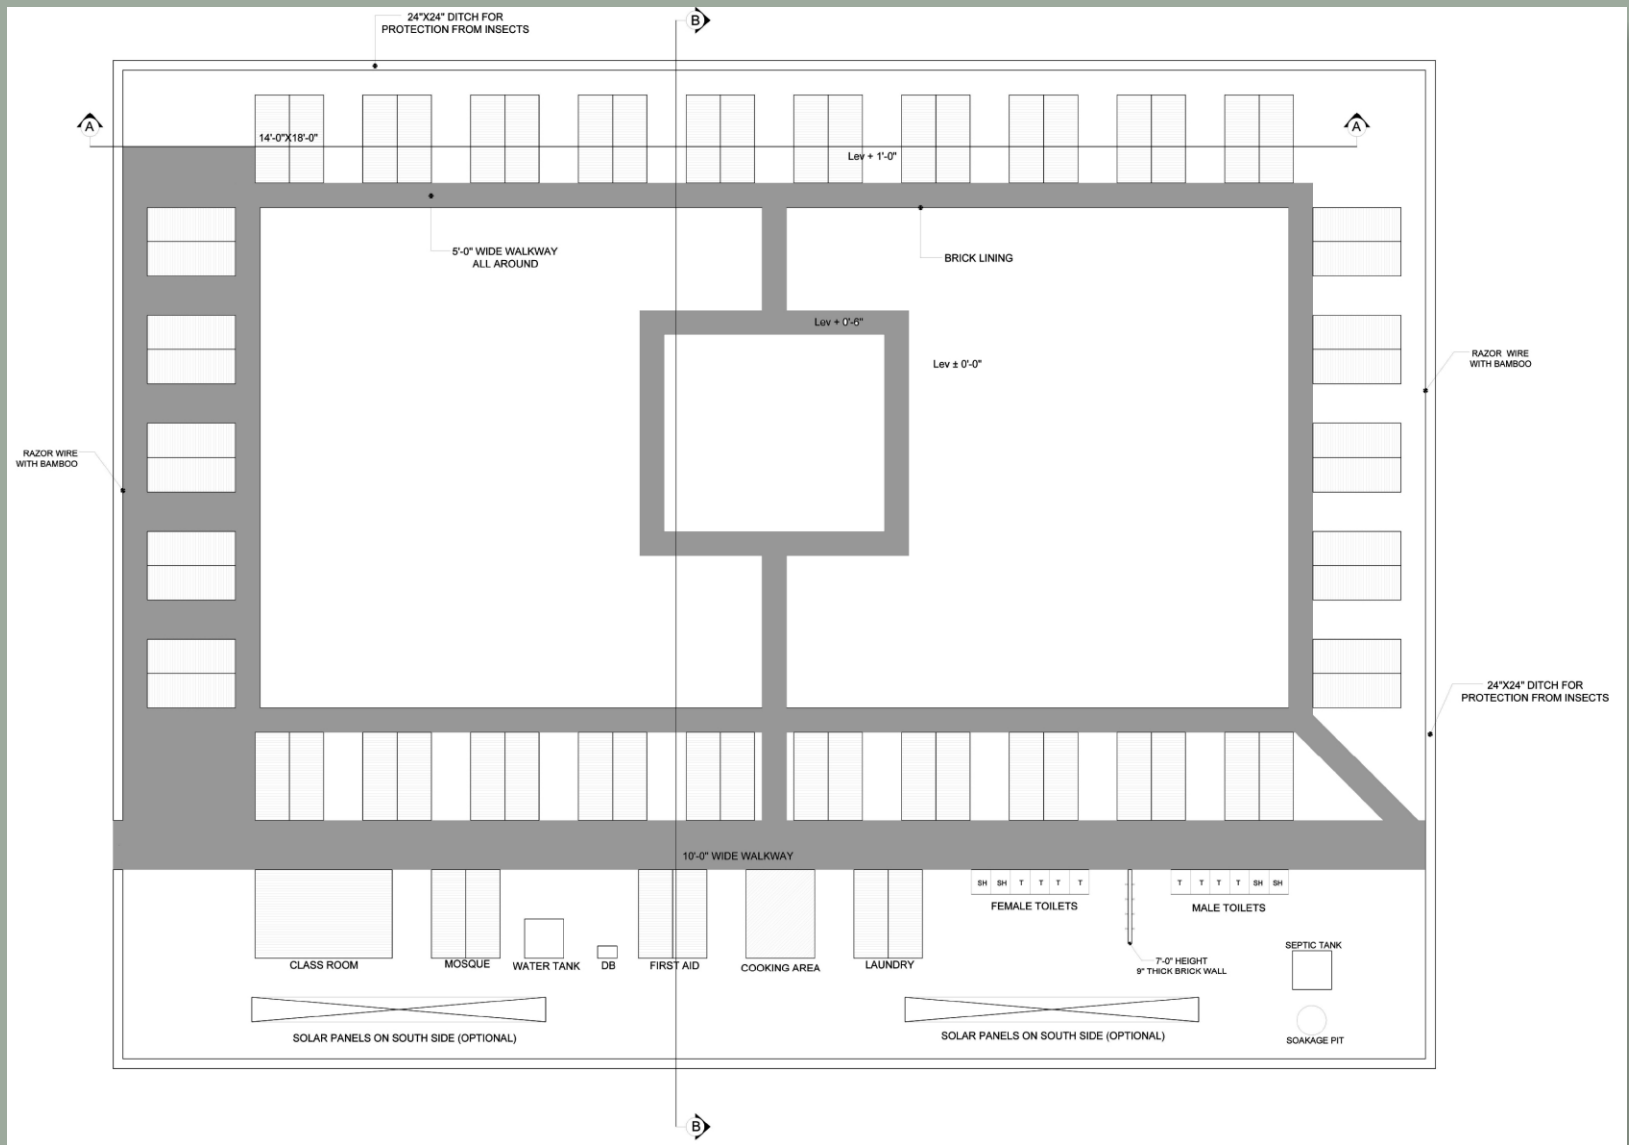

Association of  
Consulting Engineers  
Pakistan

**A**lthough Government and Civil Society are taking action to support flood relief, there is always room for more to be done by everyone in the Country. NESPAK being a leading Consulting House in the Country believe that unifying Public, Private, and Non-Governmental Sectors under the umbrella of Corporate Social Responsibility can greatly supplement the efforts of the Government of Pakistan for providing support in rehabilitation and recovery from this natural calamity. We are, therefore, spearheading an effort along with other stakeholders in the industry including the Pakistan Engineering Council (PEC), Association of Consulting Engineers of Pakistan (ACEP), Constructors Association of Pakistan (CAP), The Institute of Chartered Accountants of Pakistan (ICAP) and Pakistan Council of Architects & Town Planners (PCATP).

Under this initiative, NESPAK has proposed not only to give technical services for rehabilitation work but also to set up pilot flood relief tent villages (PRTV) in flood-affected areas in the first phase. In the second phase, we shall be developing engineering solutions for the rehabilitation of damaged houses and villages. For the first phase, a prototype design of a flood relief tent village (Modular Structure) of thirty (30) tents complete with a school, medical facility, clean drinking water, and solar power supply has been designed by NESPAK along with an estimated priced BOQs. Details of both of these are available on the NESPAK website ([www.nespak.com.pk](http://www.nespak.com.pk)) for any entity to register and download details for implementation.
